

10 INVENTIONS THAT CHANGED THE WORLD

**The job was done by: Majus
Matulionis and Kajus Stočkus 8a**

CONTENT:

- 1. Fire
- 2. Writing
- 3. Printing press
- 4. Wheel
- 5. Nails
- 6. Compass
- 7. Windmill
- 8. Medicine
- 9. The internet
- 10. Mobile phone

FIRE

- Fire was the most important discovery for humanity and was the main source for us to survive in the ancient times. It is still used everywhere these days.

WRITING

- Writing has been around for a while, approximately 3100. pr. BC. This is one of the most important discoveries in people's evolution

PRINTING PRESS

- The print press was invented between 1440 and 1450. Its essence was that it was quick to write large quantities of books.

WHEEL

- Invented about 3500 m. pr. BC. This extent facilitated agriculture, transport and trade.

NAILS

- Invention dating back to 2000 and more. Changed construction and collection of structures permanently.

COMPASS

- The first was invented in 2000. pr. BC. Created for sailors to orientate in the ocean.

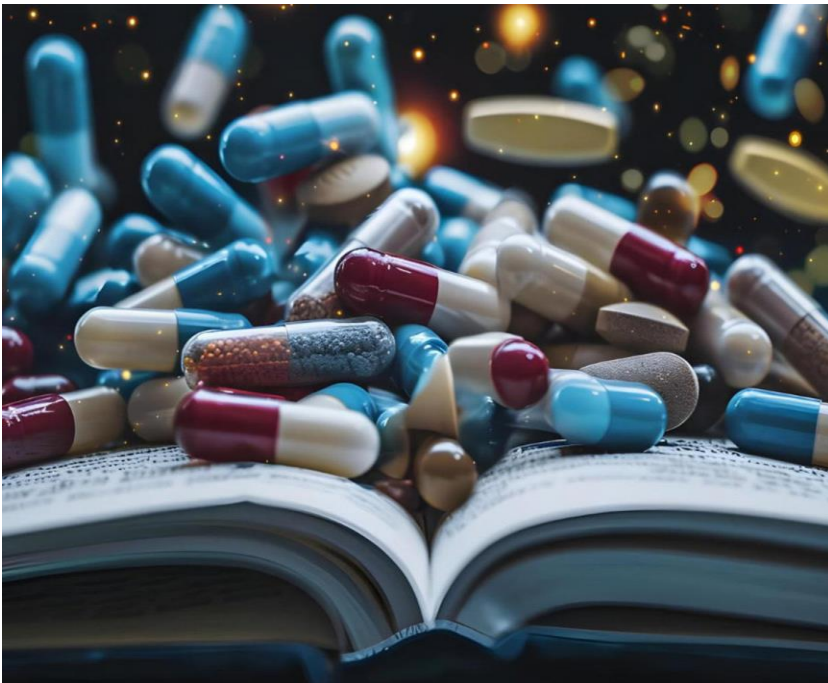

WINDMILL

- Windmill is a renewable energy and efficient way to get energy without harming nature. The first windmill was invented in 1888.

MEDICINE

- With medicines and the latest treatment technologies, we can cure diseases and save millions of people.

THE INTERNET

- The Internet is a global computer network connecting all surrounding and household electronic appliances.

MOBILE PHONE

- Was invented in 1876. Changed people's daily lives permanently.

CONCLUSION

- In conclusion, the modern world would not be the same without these and many other amazing ancient inventions.
